

Spotlight on smart sustainable procurement in practice

Experiences from the SMART SPP project

Smart procurement - Reducing costs & saving energy, 29 June 2011, Brussels

What has been achieved in Barcelona

- Installation of 198 **charging points for EV** with environmental criteria
- Environmental and energy efficiency criteria to be introduced to the model tender for the installation of **vending machines**
- And also...
 - Better knowledge of the market situation and companies better equipped or with enough time to prepare to meet our demand
 - Stronger relationship with other internal departments
 - More knowledge of the characteristics of the products purchased and to be purchased
 - Sharing and passing on the experiences and tool to other public administrations and organizations

Plans for the future?

→ Future of charging points

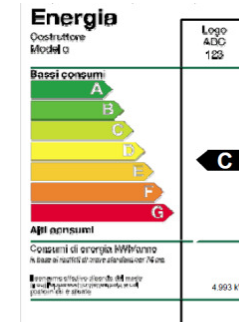

www.bcn.cat/livebarcelona

→ Global Project New vending

- Pilot test
- Model tender

- + Healthy
- + Sustainable
- + Fair trade

→ 22@Urban Lab Project

→ **Working group** to investigate new and sustainable materials / items / systems

→ **Training** those responsible for purchasing on the use of the tool
